

Currently available stations offer very little beyond  
a quite narrow range of the information spectrum.  
A number of organizations/companies are specifically  
trying to fight LPFM, and prevent stations from being  
built in our community, because they fear a  
genuine public interest beyond what  
their advertisers require.  
But isn't the essence of democracy  
enhanced by a broader range of information,  
a range enriched and informed  
by a diversity of local community interests?  
Please support LPFM.
